

SHOE DISINFECTANT SYSTEM

Fight the spread of germs throughout a facility

The Center for Disease Control (CDC) advises that viruses like COVID-19 can be carried on shoes and boots.

DISINFECTING TRAY

The 18" x 26" tray is designed to neutralize germs and remove debris by immersing the soles of shoes in a disinfecting solution

WALK-OFF MAT

Any excess fluid comes off on the adhesive backed 3'x5' WizKid Antimicrobial Runner Mat

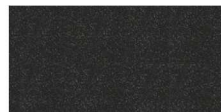

VERSATILE USE

Great for use in food processing facilities, convenience stores, schools/universities, grocery stores, medical facilities, fitness centers, airports, restaurants, or any facility where there is a concern for the transmission of viruses through foot traffic.

Disinfecting Tray
Item# TRY-YLW

Insert Mat
Item# INSRT-BLK

3'x5' Step-Off Runner
Item# RUN-3X5

3'x25' Runner Mat
Item# RUN-36

How To Use the Shoe Disinfectant System

1. Place the Insert Mat into the tray and place near entrance adjacent to the Step-Off Runner
2. Fill the tray with ½ gallon of disinfecting solution of your choice
3. Place Runner Mat in direction of foot traffic after tray use
4. Fluid level should be checked at least daily if not hourly, depending on traffic, and kept at 5/8" below the top of the tray, the Insert Mat can be changed weekly and the Runner Mat every two weeks.
