

THE POWER OF SILVER

BioCote® antimicrobial protection technology is incorporated at the time of manufacture into the plastic buttons of all SC Johnson Professional manually operated, wall-mounted skin care dispensers. The button is the primary contact point for people using these dispensers and BioCote® technology provides life-long antimicrobial protection to inhibit the growth of a broad spectrum of bacteria and molds that could potentially cause illness.

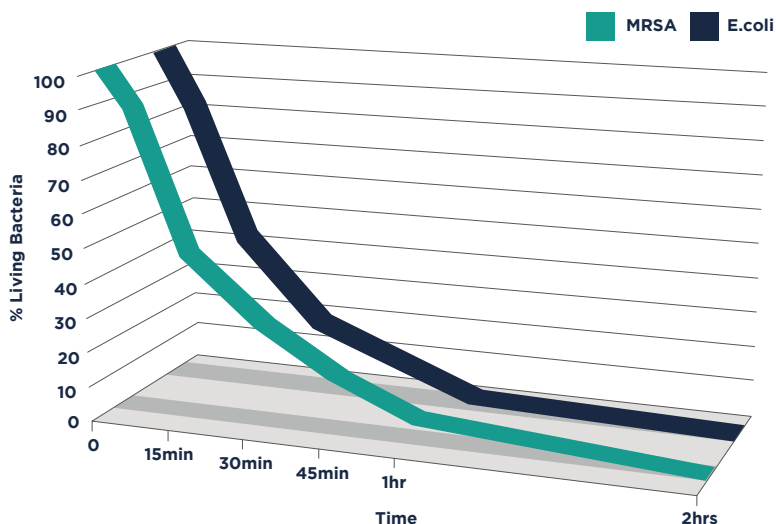

BioCote® silver ion technology is:

Effective: Reduces bacteria, mold and fungi on the surface of BioCote® treated SC Johnson Professional dispenser buttons within as little as 2 hours and achieves up to 99.99% reduction over a 24-hour period**.

Long-Lasting: BioCote® maintains its antimicrobial protection for the lifetime of the dispenser button and will not wear off, wash off or leach out.

Safe: Silver is regarded as non-toxic and is a safe and natural alternative to synthetic, organic antimicrobial agents.

* BioCote® is a registered trademark of Biocote Limited
 ** Efficacy is independently validated by ISO methods

Scientific studies prove that BioCote® treated SC Johnson Professional dispenser materials reduce high levels of bacteria in comparison to untreated materials.

HOW DOES SILVER TECHNOLOGY WORK?

1 Microbes contaminate the BioCote® protected dispenser button

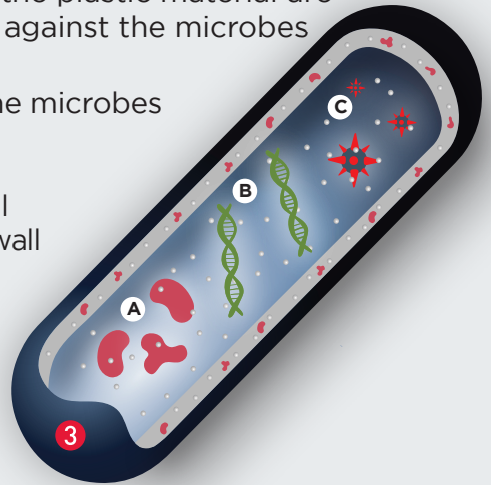

2 Silver ions incorporated into the plastic material are permanently available to act against the microbes

3 Silver ions then act against the microbes in three ways:

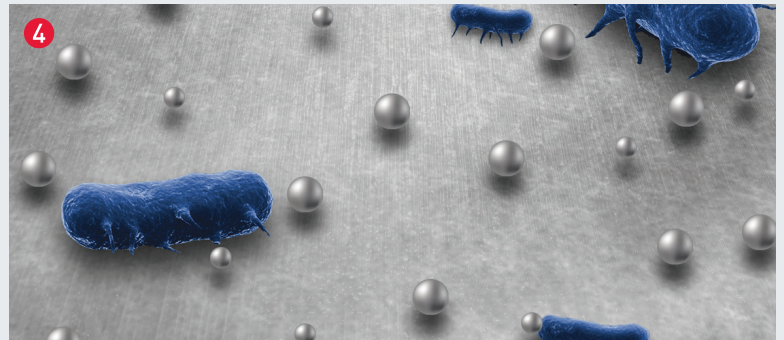

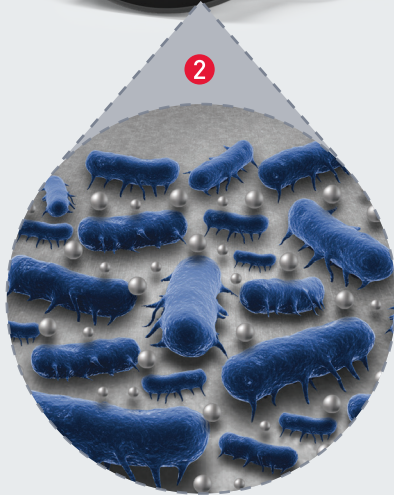

A They combine with microbial proteins in the cell and cell wall

B They interfere with DNA replication

C They promote formation of reactive oxygen species

4 Microbes are inactivated, the button is protected and continues to reduce microbial levels by up to 99.99%

SC Johnson Professional skin care dispenser buttons protected with BioCote® antimicrobial technology can be expected to harbor significantly lower levels of microbial contamination and reduce the risk of cross-contamination. BioCote® protected dispenser buttons continuously fight against microbial contamination for the lifetime of the SC Johnson Professional dispenser.
