

Meat, Fish, and Produce Trays

Easypak offers a complete line of post-consumer recycled APET meat trays designed to enhance the display of freshly packed meats and other deli products. Using our proprietary, patent-pending honey-comb like structure enhanced by other practical and ingenious features, the trays capture and hold juices and liquids even when inverted. These sturdy trays are designed to be stretch wrapped without warping or puncturing the film. Easypak's meat trays are extremely eco-friendly, made with post-consumer recycled plastic and are themselves 100% fully recyclable; they are perfect substitutes for foam trays.

Item#	Description	Size
