PRODUCT CATALOG

WWW.EATERYESSENTIALS.COM

INNOVATIVE DISPOSABLE PACKAGING SOLUTION FOR EVERY OCCASION

EATERY ESSENTIALS

is focused on providing high quality, competitively priced paper and plastic foodservice disposables to customers in the following channels: QSR, Cash & Carry, Distribution, Food Processors, Hospitality, Airlines, Entertainment, Supermarket/Grocery and C-Stores.

Eatery Essentials is the U.S. Sister Company of Vigour Pak.

Changhua Coastal
Industrial Park, Taiwan

EE and VG are vertically integrated extrusion and thermoforming manufactures of polymers for drink cups, food containers and containers with tamper evident technologies with operations in Taiwan and a new manufacturing facility in the USA. Combined facilities and warehousing in excess of 2MM sq. ft.

2425 W Daniel Dale Rd., Dallas, TX 75237

Square Feet: 399,971
Office Finish: 19,396

CERTIFICATION & CAPABILITIES

BRC & FSSC22000 Certifications make us
Global Food Safety Initiative (GFSI) certified.

BRC

FSSC-22000

FSSC-22000

3 FACILITIES

PAPER

CUPS & CONTAINERS
PBS, PLA, PE COATING

6 double wall paper hot cup machines.

34 German-made fully integrated and automated paper cup/container forming and packing lines.

Our auto packing lines place cups directly into sleeves preventing any foreign objects from coming in contact with finished goods. The monthly paperboard plastic coating capacity of our laminating line is over 5,000 tons.

PLASTIC

CUPS & CONTAINERS
PET, RPET, PLA, PP & PS

2 PROGRESSIVE IN-LINE (extrusion and thermoforming) lines comprising all the operational components to transform raw polymers into finished products.

14 EXTRUDERS with monthly capacity of 400 tons each of PET.

26 HIGH SPEED THERMOFORMERS which produce cups and containers from PET, PLA and PP. Total capacity of over 200 million pieces per month.

PRINTING APPLICATION

4 German Heidelberg offset printing machines that print up to 6-colors and 8-color FLEXTONE machine for paper cups and containers.

4 6-color Van Dam UV offset printing machines for plastic cups and containers.

BUT-N-LOC

PATENTED BUTTON LOCK DESIGN

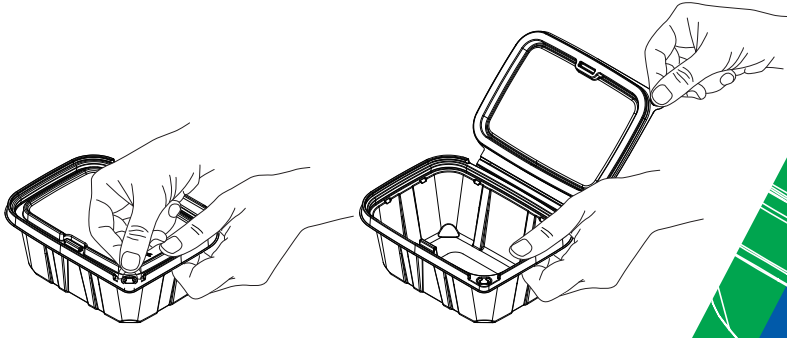

- ✔ Original innovators of the button lock design
- ✔ Only tamper evident design that works with 1 piece hinged or 2 piece containers
- ✔ No sharp edges, no wasteful strips
- ✔ Available in PCR bottle flake and PET blends
- ✔ High clarity and tight lid fit prevents leaks

CLOSE THE LID

PUSH TO "LOC" BUTTON

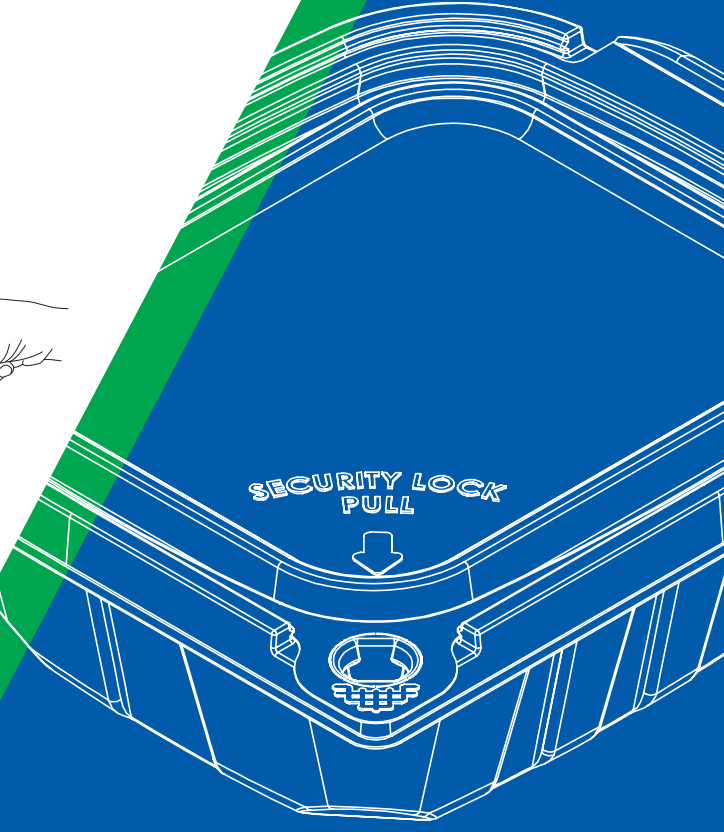

CLOSE

PULL THE TAB, BUTTON REMAINS

OPEN THE LID

OPEN

 PATENTED BUTTON LOCK DESIGN

BUT-N-LOC

The innovative tamper-resistant locking mechanism and seal ensures quality and eliminates the need for shrink bands and wrap labels

The button "Loc" tab fastens to the top of the base. If tampered with prior to purchase the **BUT-N-LOC** button will not be connected to the tab and a clean hole in the tab will be evident. The engineered tight parameter seal promises a leak resistant experience.

BUT-N-LOC branded TAMPER EVIDENT HINGED LID CONTAINERS can be made from 100% post-consumer recycled PET (rPET).

These containers offer great environmental benefits, and will enhance the look of your product with their crystal clear clarity.

Features a patented security **BUT-N-LOC** tab design which reveals tampering. Unlike other containers that require a plastic tear-off strip, this container has no external pieces to throw away which makes for safer and smoother handling.

BUT-N-LOC automatic closing machine is designed specifically for our Tamper Evident Hinged Lid Containers. Works with sizes 8oz to 64oz, runs up to 80 containers per minute. The aluminum and steel construction with electronic control system makes for flexible ease of use and operation.

BUT-N-LOC closing machines increase productivity through reduced labor costs, improved reliability and output. An ideal secure packaging system for a wide variety of fresh food products.

**TAMPER EVIDENT
SQUARE BOWLS**

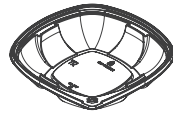

TAMPER EVIDENT SQUARE BOWLS

BUT-N-LOC branded PET TAMPER EVIDENT SQUARE BOWLS are ideal for processors, supermarkets, wholesale clubs, and C-stores.

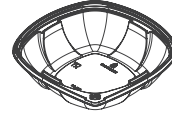

Crystal clear lids, crack-resistant and leak resistant to ensure safe and stable handling. Black or color base also available.

Available in two foot prints - 9" (Large) and 7.5" (Medium) in a variety of sizes, single or compartmented options, 5.5" footprint coming soon. The square bowl's stackability and fit increase shelf space efficiency.

RETURN TO NATURE

SUSTAINABLE COMPOSTABLE

Eatery Essentials has endeavored to offer products that are made from recycled content and plant-based material.

We are helping the environment by using post-consumer recycled PET (RPET) resin, and bio-plastic such as PLA (Poly-Lactic Acid) which is derived from corn starch, and PBS (Poly-Butylene Succinate)

As a company committed to improving our environmental footprint, we offer compostable and biodegradable products, these sustainable products have the advantages of a traditional plastic package but with a reduced environmental impact.

From 2020, we are pleased to offer new eco-friendly product line under our RETURN TO NATURE brand. Our Bio-PBS lined paper cups are not just great for our customers, it's great for the planet.

We will continue to look for innovative materials and reducing our impact on the environment. These are small steps to a more sustainable future.

& Compostable

RETURN 
TO NATURE™

BIO-PBS LINED PAPER CUPS

PBS (Poly-Butylene Succinate) derived from corn or sugarcane and processed into Bio-PBS. Due to its eco profile and high versatility, Bio-PBS is gaining attention in the framework of the growing bio-based economy.

Bio-PBS has a high heat resistance among the general biodegradable resins; it's suitable for use with hot beverages up to 100°C.

Made from Bio-PBS lined paperboard, both the fiber and coating used to make the cup come from fully renewable materials, this combination makes RETURN TO NATURE paper cups compostable and fully biodegradable in facilities (6 months) or in soil at open air landfill site (30°C (86°F) / 50% relative humidity conditions).

**Reduce
carbon footprint**

**High service temperature
up to 100°C**

**BPI certified
OK COMPOST certified**

BIO-PBS LIFE CYCLE

BIO-PBS
LINED
PAPER
CUP

100%
BIODEGRADABLE
& COMPOSTABLE

Bio-PBS is similar in process to LDPE, Bio-PBS lined paper is not very different in processing and handling from traditional cups, so our range of Bio-PBS lined paper cups is same as traditional range.

Airborne bacteria are not strong enough to break down or degrade the Bio-PBS polymer chain so shelf life is very good, approximately 24 months.

DOUBLE WALL PAPER CUPS

Comfortable

Distinguishingly smooth outer wrap makes for a perfect surface to print clear and unambiguous artwork.

Built-in thermal layer makes the outer surface smooth, comfortable feel and gives a tactile impression for customer.

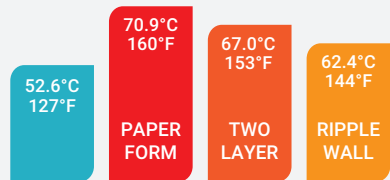

Sturdy & Durable

Our secure and form-fitting lid creates a superior sealed barrier which helps prevent leaks.

The inner air space helps conserve heat within the contents of the cup, as well as maintaining a cool to the touch outer wall.

Special wider bottom design provides better stability for placement.

CUSTOM PRINTING

GET YOUR MESSAGE DIRECTLY INTO THE HANDS OF YOUR CUSTOMERS.

EASILY & EFFECTIVELY PROMOTE YOUR BUSINESS

Custom printing is the perfect solution to build your brand image and grow market awareness. It allows you to cost effectively advertise your company's brand - products, style and values - and provides a point of distinction for your brand in an otherwise saturated market. It is a portable billboard for your business right in your customers hands. It's an advantage that what we like to call "Brand In Hand".

Customize all your foodservice disposables – paper hot and cold cups, paper food containers, plastic drink cups, plastic round containers and cup sleeves.

WE UNDERSTAND PRINTING

PRINTING APPLICATION

We have world-class printing equipment. For plastic cups and containers, we have four 6-color Van Dam UV offset printing machines. For paper cups and containers, we have 8-color FLEXTONE machine and four German Heidelberg offset printing machines that print up to 6-colors.

PRINTING SERVICE

We manage all design and print services in-house. We can recreate or modify your existing artwork or our designers can help you develop an entirely new brand concept. We can even create mock-ups so that you can see what the actual product will look like once artwork is finalized.

WE'RE HERE TO HELP WHATEVER YOUR PRINTING NEEDS

5 STEPS

Simple & Easy!

01

Choose the cup or container size(s) you need. We offer a wide range of sizes on paper cold cups, paper hot cups – single or double wall, paper food containers, PET drink cups, PET round deli containers and PLA drink cups.

02

Choose up to 6-colors for your plastic cups / containers, 6-colors for your paper cups and containers and up to 4-colors for your customized PLA drink cups and cup sleeves.

03

Send us your artwork as an AI (Adobe Illustrator), EPS (Encapsulated PostScript) or PDF file. If electronic artwork is not available, send a sample of your cup or container and we will recreate the artwork by hand.

04

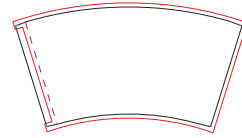

Once you have perfected your design, we will produce a digital file of the artwork for you to review and approve. We can also create a mock-up, if needed, for a minimal charge.

05

The printing process begins once the digital artwork file and/or mock-up has been approved and purchase order has been received. Custom printed products will be produced and delivered within our stated normal lead times.

Our minimum order quantity for most custom prints is 50,000 pieces per sku.

ARTWORK REQUIREMENTS

FILE FORMAT ▶ .AI

- Shapes and fonts must be outlined.
- Font size must be at least 8 pt bold.
- Artwork elements must be in layers, not merged.
- All images embedded and must be at least 300 dpi or higher.
- Define all colors CMYK or PANTONE® Solid Coated / Uncoated Color Code.
- PANTONE® Solid Coated Colors can be used, but not all colors can be achieved.

Available for all stock sizes.
Please feel free to contact us
for a template to get started.

If your artwork is designed by Photoshop or Corel Draw,
please save it as a high resolution PDF, AI, or EPS file.

Minimum Order Quantity	50,000 pcs/size
Maximum Printable Colors	6 Colors Flexo Printing
Plate Fees (per color)	\$100/plate/color/size

UNDERSTANDING PRINTING METHODS

4-COLOR PROCESS PRINTING

Process printing refers to a process that uses 4 colors - Cyan (C), Magenta (M), Yellow (Y) and Black (B) to reproduce a wide range of colors by mixing the colors together as they are printed. This is known as CMYK process printing or 4-color process printing. A wide range of colors can be created with just 4 color printing plates so the number of reproducible colors is much higher than four. PANTONE® color codes can be provided as a final color reference, but not all PANTONE® colors can be reproduced.

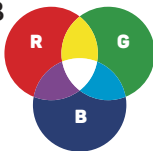

SPOT COLOR PRINTING

Spot color printing uses a color system of solid, pre-mixed colors, also known as PANTONE® colors. Spot colors are more accurate as you have already determined the color by its specific PANTONE® number. It is generally more economical if printing is kept to 3-colors or less.

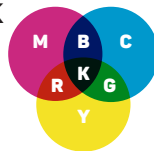

Due to the use of food-grade inks, not all PANTONE® colors can be achieved. Also, spot colors are nearly impossible to replicate exactly on digital print devices such as color laser printers. Please note that the same color may appear differently on different raw materials.

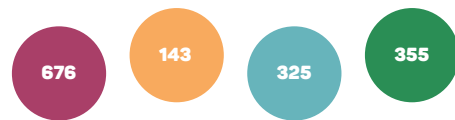

RGB

CMYK

SPOT COLOR

PRINTING INFORMATION & DISCLAIMERS

COLOR ACCURACY

When a PANTONE® color code is provided, finished products are expected to be within 2 PANTONE® colors, either up or down (refer to PANTONE® Solid color book). Due to food grade inks, not all PANTONE® color codes can be achieved, and any possible replacement is only at the manufacturer's discretion.

INK ODOR

As a result of printing with food grade inks, a degree of ink odor should be expected in all custom printed products. Any possible replacement is only at the manufacturer's discretion.

PRINT GAP

A ¼" gap is left between the leading edge of the design PET/PLA cups so that the design does not overlap.

MINIMUM & LEAD TIMES

- All stated minimums apply for each size and/or design ordered. Minimums are subject to change at any time. Due to the nature of custom printed products, there may be a +/- 10% over/under run (variance between amount ordered and amount produced).
- Lead times are estimated and are not guaranteed.

PLATE CHARGES

Plate charges will not be charged for reprint orders provided the existing plates are in good condition. If left unused, printing plates have a maximum life of 18 months. Customer will be notified if new plates will be necessary for their re-print orders and subsequently billed for the new plates.
