RETAIL

CHEM-READY® WIPING SYSTEMS

1. Place roll in bucket.
2. Add enough solution to fully saturate the wiper roll.*
3. Attach lid and wipe surfaces clean!

Chem-Ready System (Cleaner, safer and easier)

Everwipe's Chem-Ready wiping material is designed to work with cleaning solutions, sanitizers and disinfectants. This exclusive material performs like a wiper yet does not bind quaternary chemicals like ordinary towels and wipers. The non-woven cloth traps particles and helps scrub surfaces to remove harmful soils.

Features & Benefits

Everwipe's Chem-Ready delivery system allows you to create your own wet wipe with the cleaning solution of your choice. The closed bucket system greatly reduces the possibility of surface cross-contamination. The Chem-Ready bucket and compact wiping rolls are extremely portable, easily resealable and spill proof. The wiping material is ideal for use with quat, sanitizers and disinfectants. The system is cleaner, safer and easier than traditional open bucket or spray bottle systems.

Product ID	Description	Sheet Dimensions	Pack Size
