

Foodservice Packaging Solutions

Innovations That Think Outside the Box

Fluted Clamshells

Redesigned and Better Than Ever

We've improved this popular takeout packaging solution:

- New front-lock is easy to close
- Ideal design for back-of-house operations — sandwiches can be built right in the box
- Available colors: white/kraft
- Available sizes range from small square to large rectangle

Clamshells set apart from the competition:

- Fluted design provides insulation that maintains food temperature and appearance by eliminating condensation—veggies stay crisp and bread won't get soggy
- Grease-resistant barrier helps maintain package integrity & appearance

naturally green

- 100% Compostable
- Reviewed and approved for commercial composting systems
- All fluted clamshells contain up to 45% post-consumer recycled paper.

They enhance your image and the presentation of your food.

THERMO GRIP™ Cups

A Cup Steeped In Confidence

Double Wall Paper Cup

- Patented design creates a 360° air chamber - This keeps the outside comfortable to hold
- Eliminates the need for double-cupping or protective sleeves
- Smooth surface for great graphics
- Available in 8, 12, 16, 20 and 24 oz. sizes

How can THERMO GRIP™ cups enhance my coffee program?

- It's an insulated cup that works
- It's a sturdy cup – especially for larger sizes
- You'll stand out from the pack with cup graphics that build your brands

naturally green

Made with 25% recycled material, the highest of leading brands

THERMO GRIP™
Perfect for coffee program upgrades or brand extensions.

See What Really Moves Coffee Sales

Beverage on the MOVE™

Beverage on the Move™

The Box That Started A Movement

Opportunity

Leading coffee segment retailers were unaware they could sell more coffee beyond the “one-cup-at-a-time” platform. Bulk coffee demands—especially at peak periods were difficult to fulfill.

Key Insights

LBP partnered with coffee retailers to form and develop a bulk beverage system: Beverage on the Move™, an innovative addition to cups with a box designed with “POP, FILL & GO™” simplicity.

MARKETING TIP

Actively promote and bundle Beverage on the Move™ with existing menu offerings. You will see increased impulse and incremental sales.

Results

- Early adoption by retailers of a new vessel to increase bulk coffee sales led to sustained market-leading positions in the coffee segment.

Incremental sales increased dramatically, and a new category was born.

Pack Drop & Go Catering Solutions

See How We Cater To Every Need

Display and serve sandwiches, baked goods and more in windowed catering squares. Transport pasta and other steam pan items in sturdy, interlocking catering trays. Offer soup and salad in LBP's disposable Soup-N-Serve™

- Fast turn around

Naturally Green

90% of packaging manufactured by LBP is produced with recycled materials

LBP has an extensive line of products made with corrugate that accentuates our commitment to the environment and our focus on sustainability.

About corrugate:

- Most recycled packaging material - 78% of containers are recovered
- Nearly 25 million tons of corrugate is recycled annually
- 93% of corrugate boxes are made with material supplied by the Sustainable Forestry Initiative (SFI)

LBP products manufactured with corrugate have been reviewed and approved for commercial composting systems.

LBP is a proud member and supporter of several conservation organizations:
