

### Reduce plastic usage without sacrificing quality or performance

The perfect choice for serving hot and cold foods, these mineral-filled polypropylene products are versatile enough to use for serving small entrees, salads or sides in high traffic environments. Features include:

- Can be used for both hot and cold food applications for maximum versatility.
- Moisture and grease resistant to reduce clean-up efforts.
- Dependable construction made with 40% less plastic.
- BPA Free and microwave safe.
