Practical & stylish | Award-winning quality | Plant-based & compostable
Unrivalled experience in food & packaging waste recycling

Introducing Vegware's new Bella pots!

Made from renewable plant-based PLA, these sturdy, clear pots - available in 8, 10, 12 & 16oz - are perfect for granola and yogurt, mixed salads, or cold desserts.

On-pack eco messaging in green and Vegware's Green Leaf tab showcase their compostable credentials.

Fits our 3oz insert for a food combo and our 96-Series lids for food on the go. The options are endless!

CONTENTS

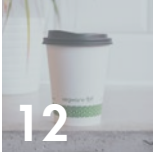

Vegware manufactures a range of more than 150 plant-based catering disposables, all designed to be commercially composted with food waste where accepted. Our range includes hot & cold drinks cups and lids, straws, tableware, cutlery and takeout packaging - all made from plants.

A GUIDE TO ECO TERMINOLOGY

With single-use disposables on every foodie's mind, and plant-based trending in the food industry, eco-friendly packaging is in the spotlight.

But the terminology can be confusing. Cut the confusion with this handy guide by Vegware, the global specialist in plant-based compostable foodservice packaging.

Renewable

A resource is considered 'renewable' if it can be naturally regenerated on a human timescale.

This means that the rate of regeneration must keep up with harvesting and consumption.

Recycled and reclaimed

Recycled content refers to materials that have been diverted from the post-consumer waste stream.

For example, Vegware's paper bags are made from 100% recycled content.

Reclaimed content describes by-product waste materials diverted during a manufacturing process (sometimes referred to as pre-consumer recycled content).

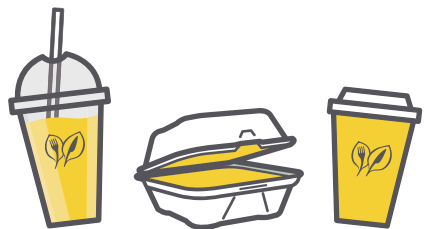

We use reclaimed sugarcane fiber to make our bagasse tableware and takeout boxes. The fiber is a by-product of the sugar industry which is no longer needed once the sugarcane has been pressed for juice.

Bio-based

A product or material is considered 'bio-based' if it is completely or partially derived from biomass.

This includes harvested plant-based materials such as wood, animal-based materials such as wool, processed biomass such as paper, and man-made materials derived from natural sources, such as the bioplastic PLA which is made from sugars.

Vegware's full product range is made from plants, using renewable, lower carbon, recycled or reclaimed materials.

Compostable (at home / industrial or commercial)

Composting is biodegradation in composting conditions.

This means that the material is broken down by microorganisms in certain conditions (temperature, humidity, presence of oxygen) in a certain time without negatively influencing the quality of the compost.

This can either be done in a conventional compost heap, making it home compostable, or only specifically in an industrial composting facility with higher temperatures, more humidity, and more oxygen.

Within industrial composting, Vegware breaks down in under 12 weeks. So instead of being buried or burnt, your compostable catering ‘waste’ creates nutrient-rich compost that helps plants thrive.

Biodegradability

A material can be regarded as biodegradable when it can be broken down by living organisms into biomass, water and naturally occurring gasses (such as methane and carbon dioxide).

At Vegware, we avoid this term as it is too vague, without specifying timescales or the environmental conditions of the product breakdown.

Oxo-degradable plastics

Oxo-degradable or oxo-biodegradable plastics are conventional plastics to which chemicals are added to accelerate the breakdown process under the action of sunlight and or heat and oxygen. These plastics are being banned by the European Union under the Single Use Plastics Directive, as they fragment into plastic flakes which pollute the environment.

Circular economy

The circular economy is an economic system that is based on three principles:

- ✦ Designing out waste & pollution
- ✦ Keeping products & materials in use
- ✦ Regenerating natural systems

Closing the loop

Vegware’s US Waste Director helps clients join the circular economy. By using plant-based compostable Vegware foodservice disposables and composting them after use, we design out waste (conventional foodservice packaging), and create a useful end product (compost).

In turn, compost replenishes soils, regenerates natural systems, and helps grow plants.

MADE FROM PLANTS

Vegware plant-based catering disposables are made from renewable, lower carbon, recycled or reclaimed materials, and can be commercially composted along with food waste. Once taken to composting, it will break down in a commercial composting facility in less than 12 weeks. We work actively with the waste sector to create composting solutions.

We hold the deepest set of compostability certifications in the industry, including Biodegradable Products Institute (BPI) and Cedar Grove/Composting Manufacturing Alliance (CMA).

PAPER & CARD

Sustainably sourced kraft board, using recycled content where we can. Clear plant-based PLA window.

PLA & CPLA

Strong & light. Plant-based. Clear PLA for cold use, CPLA for hot.

NATUREFLEX

Clear film made from wood pulp. Anti-grease, heat sealable.

BAGASSE

Reclaimed sugarcane. Sturdy & practical, for hot and cold use.

SHEETS

Sustainably-sourced unbleached paper. Wax coated for grease resistance.

INKS

Vegetable or water-based, with a great finish.

COMPOSTABLE
IN INDUSTRIAL FACILITIES
Check locally, as these do not exist in many communities. Not suitable for backyard composting. CERT # 2122186

OUR LATEST INNOVATIONS

PLA FOOD BOWLS

- Part of our Bon Appetit mix & match range
- Clear visibility for cold foods
- Ribbed design for easy grip to serve & carry
- Made from renewable plant-based PLA

CARRIER BAGS

- Made from recycled paper
- Sturdy internal handles for extra strength
- Custom print available
- Option for no handle grocery bags

BAGS TO GO

- Range extension
- Recycled kraft paper in eco brown for cold foods - options for flat and gusseted
- White gusseted bag, grease resistant for warm or cold foods like loads of fries or iced buttery pastries

IN-LINE BAGASSE

- Stylish, eco, economical
- Wide range of plates, bowls and takeout boxes
- For hot or cold food use
- Made from bagasse, reclaimed sugarcane
- Natural fibers allow food to breathe, so hot food stays crispy
- Rustic finish with natural grains
- Formed & trimmed in single stage for production efficiency

PLA SIPPING LIDS

- ☛ Clear raised sipping lid for cold drinks
- ☛ Simply open & secure snap-back tab

- ☛ Perfect for iced coffee, soda, kombucha & chilled drinks
- ☛ Fits all Vegware 96-Series cold cups
- ☛ Made from renewable plant-based PLA

CUSTOM PRINT

Feel like showing off your logo and brand colors, but still demand the **greenest** packaging? Vegware's in-house custom print service helps you brand our award-winning eco catering disposables.

DESIGN OPTIONS ARE ENDLESS!

Add special effects like embossing and foil stamps, or even a tear-off tab to transform your cup into a promo voucher or lottery ticket. Whether you use Vegware cups, food cartons or anything in between, custom print offers a full creative service to showcase your brand.

BAGS TO GO

Wide range of eco bags for sandwiches, cookies, and paninis. Our bloomer window bag is lined for freshness. Serve cold pastries in our kraft brown bags, windowed options made from plant-based PLA or opt for recycled paper with no window. Our new white gusseted bag is grease-resistant, perfect for warm or cold foods such as toasted sandwiches or loads of fries. Pass the pastries...

Code	Product	Case count
