Foodservice Products

SPRING/SUMMER 2021

For People And The Planet

This year marks the 17th anniversary for World Centric, and a pivotal moment for the company and the world. The planet's ecological systems continue to be extremely stressed due to human activities, and the cycle of poverty is exacerbated even further by the pandemic and economic inequities.

Companies need to make a difference by working to provide for basic necessities like food, water, sanitation, education, healthcare and more. They also need to effect environmental change, especially in communities where resources aren't available to mitigate environmental degradation.

Today, just like 17 years ago, we continue to uphold the same mission and values to be of service to people and the planet in all that we do, and elevate awareness of global sustainability issues.

Looking ahead, World Centric is committed to innovating compostable, plant-based materials and packaging to help reduce the environmental impact of the foodservice industry on the planet.

INTEGRATE HEALTH

PROJECT: Ending Preventable Deaths of Women and Children in Togo, West Africa

ALLOCATION: \$124,927 | FISCAL YEAR: 2020

Healthcare

In Togo, a West African nation on the Gulf of Guinea, 49% of the population lives on less than \$1.90 per day, 368 women die for every 100,000 live births, and nearly one in ten children will not live to see their fifth birthday. The majority of these deaths are from diseases that are entirely treatable at very low costs, like malaria, diarrhea, and pneumonia.

Unfortunately, Togo lacks the functioning healthcare system required to deliver effective treatments to women and children in need. Essential healthcare systems, including personnel, supplies, and training, are currently absent or insufficient throughout much of the country. As a result, 70% of Togo's population, nearly six million people, live without access to adequate healthcare.

The mission of Integrate Health is to make primary healthcare accessible to all. Integrate Health works alongside governments and local communities to implement and study their Integrated Primary Care program in order to achieve universal health coverage.

By integrating professional Community Health Workers with improved care in public clinics, their approach creates a patient-centered health system that is accountable to the community and dramatically reduces mortality in severely resource-limited settings.

"When my three children were sick at the same time, I was afraid because I didn't think I could afford care. A community health worker came to my house and explained her job. I was anxious at first but was obliged to trust her. She diagnosed all three children with malaria and treated them for free. A day later she followed up, and all of my boys were healed."

**-Sanda Afohou,
Community Member**

Over the last four years, IH and World Centric have created long-lasting impact for women and children in Togo by expanding to a new district each year. In July of 2021, IH will expand to the Binah district with supporting funds from World Centric's 2020 profits.

STAFF GIVING STORY

Big Table/Another Round, Another Rally

Photos courtesy of Big Table and Another Round, Another Rally

PROJECT: Assisting restaurant workers out of work due to the pandemic

ALLOCATION: \$8,170 | FISCAL YEAR: 2020

Financial Assistance

The restaurant and hospitality industries are the largest in the country by a magnitude of 2x, and combined they are growing faster than any other industry. Yet, this industry is composed of people from some of the most vulnerable groups: single parents, LGBTQ, at-risk teens, immigrants, and ex-felons trying to turn

their lives around. And, the majority of foodservice workers are part of the working poor - one in six don't earn enough to put them above the US poverty line, double that of any other working population in any other industry.

The industry also sees the highest rates of people struggling with alcohol and drug addiction, divorce, job instability, rapid turnover, and almost no safety net. But because this is the hospitality industry, foodservice workers must keep smiles on their faces to greet the rest of us. Because of this, their needs are often overlooked.

Big Table cares for restaurant and hospitality workers before they fall off the ledge by building community and caring for those in crisis, transition, or those just falling through the cracks.

This care is given through a referral model - Big Table builds a network of managers, owners and employees across the industry in Spokane, San Diego and Seattle. When a foodservice worker sees a coworker in need, they can refer them to Big Table for help.

With a donation of \$3,910 from World Centric's 2020 staff giving program, Big Table will be able to provide hospitality workers in crisis with immediate relief grants. Big Table's holistic approach to care also provides long-term support for workers even after their initial crisis has passed. This includes coaching and mentoring, and connecting those in need with local resources (doctors, dentists, therapists, lawyers, etc).

Another Round, Another Rally provides \$500 reimbursement grants and immersive educational scholarships to further the education of underrepresented voices in the community, and supply emergency assistance to those employed in

restaurants, bars, and hotels who have fallen on unexpected hardship.

Half of grants disbursed in 2020 were given to undocumented hospitality workers who are unable to receive unemployment assistance. With a donation of \$4,260 from World Centric's 2020 staff giving program, Another Round, Another Rally will be able to provide immediate relief to the workers who are the backbone of our industry.

NEW FIBER CUTLERY AND LARGE SERVING UTENSILS

World Centric is proud to bring you a new generation of cutlery made from unbleached bamboo, sugarcane and wheat straw plant fibers, not plastic. From spoons, forks and knives, to serving utensils and even sporks, our durable, fully compostable fiber cutlery is the most sustainable answer to providing serving and eating utensils when only a plastic free solution will do for your guests.

NEW World Centric FIBER CUTLERY

Unique design
sustainably made by
World Centric

Compostable in
a commercial
compost facility*

Innovative,
lightweight and
durable design

Helps reduce unrecyclable
plastic in the environment

Our new cutlery is made from unbleached plant fiber, not plastic. From spoons, forks and knives, to serving utensils and even sporks, our durable, fully compostable fiber cutlery is the most sustainable disposable cutlery on the market. Along with our TPLA cutlery made from plant-based plastic, our fiber cutlery lessens our impact on the environment and gives our customers one more alternative to regular petroleum based plastic cutlery which is not compostable or recyclable.

How does World Centric fiber cutlery compare to plastic cutlery?

	World Centric Fiber Cutlery	Plastic Cutlery
 Material	Made of renewable plant fibers from sugarcane bagasse and fast-growing bamboo	Made of non-renewable fossil fuels such as petroleum oil and natural gas
 Planet Health	Made of plants that absorb carbon while growing	Plastics manufacturing negatively affects air quality, public health, and the climate
 End-of-Life	Commercially compostable, even with food residue	Recycling is unlikely due to size and contamination with food residue

BULK AND WRAPPED COMPOSTABLE PLA AND TPLA CUTLERY

World Centric® offers a complete range of certified compostable cutlery made from plant-based plastic, not petroleum. Our certified compostable cutlery is available individually wrapped, in assorted kits, or in bulk. World Centric PLA and TPLA utensils compost within 3 to 6 months in a commercial composting facility where available.* The teardrop-shaped opening in the handle of our cutlery is a trademark of World Centric.

FIBER CLAMSHELLS, CONTAINERS, COMPOST-A-PAK® & SOUFFLÉ CUPS

Bamboo, sugarcane bagasse and wheat straw fibers can be used to make sustainable alternatives to polystyrene and plastic tableware. Some of these materials are considered residue after crop processing and are often burned. World Centric sees these fibers as a valuable resource to make products like plates, take-out containers, bowls, and other compostables.

FIBER MEAT & PRODUCE TRAYS, SCHOOL TRAYS AND SERVING TRAYS

Our trays are made from unbleached plant fibers with a bio-based lamination where indicated. Using annually renewable agricultural feedstocks is the perfect alternative to petroleum-based containers as they take less energy to produce and are certified compostable.

*Suitable for cold items only

A smiling woman with long blonde hair is the central figure. She is wearing a blue and white patterned top. In her right hand, she holds a white NoTree cold cup with a blue band and a straw. The background is a bright, out-of-focus outdoor setting. An orange banner is at the top, and a dark blue text box is on the left side.

NOTREE® AND FSC® PAPER COLD CUPS, LIDS AND STRAWS

Our NoTree® cold cups are the sustainable replacement for paper cups lined with plastic, which aren't compostable or recyclable. NoTree products have a bio-based lining to make them leak proof and are certified compostable where facilities exist.

CUSTOM PRINTING PROCESS

Important Information and FAQs

- All artwork, fonts, and spot colors are to be supplied by the customer, World Centric does not provide design services
- All proofs are digital, printed samples are not provided
- Lead time starts once we have received a purchase order
- World Centric is unable to stock or carry inventory on custom prints. Orders will ship in full to customer upon time of arrival
- World Centric reserves the right to refuse any custom print order if we deem the graphics, logo, product or company are inconsistent with our values
- Email insidesales@worldcentric.com or your sales representative for more details

Introducing New World Centric CUSTOM DESIGN STUDIO

Create recognizable brand expressions that stand out

We collaborate with you to design leading edge solutions that work well and reduce environmental impact. We do this by merging plant based materials with exceptional product design, engineering and manufacturing processes from the beginning, to the end of your product's life.

Research, Discovery & Concepting

Our team will work closely with you to define visual and functional requirements. We offer a variety of methodologies and visualization techniques which can be curated to your specific needs.

Design, Prototyping, & Testing

The development of approvable physical samples is a key step in our process. We work with a variety of materials, processes, and high quality factories to realize your ideas quickly.

Manufacturing & Logistics Management

Our operations team can quickly bring your designs into production and delivered around the world. As a certified B Corp and members of the 1% For the Planet network, we follow our principles across our entire supply chain, logistics, and quality programs.

Case Studies

SALADS

A young, nationwide salad and healthy bowl brand was looking to reduce waste and introduce sustainable materials into their growing business.

Our streamlined and efficient solution enabled the mixing of their whole food ingredients into the final service bowl; eliminating extra prep, water consumption, and added labor time.

Working closely with their creative team, our sustainable and compostable materials enabled new shapes and forms, not possible with traditional manufacturing processes, to be created. These iconic forms have delighted customers and established a strong social media presence.

NOODLES

A California based fresh noodle take-out chain needed help improving their existing product to be more sustainable, compostable, and usable.

Our custom lid solution separated the noodles from broth, providing a simple and elegant way to ease preparation and maintain freshness. Combined with an easy to hold bowl shape, the finished package results in a truly enjoyable quick noodle experience.

World Centric customer success story

Las Olas partners with The Compost Group to divert food waste from landfills

Our society has an urgent need for more widespread commercial composting facilities to keep food waste out of landfills, where it does harm to the environment by releasing methane, one of the most potent greenhouse gases.

Across North America, many restaurants are discovering small-scale community composters that are stepping up to help local residents and foodservice operators reduce their waste.

One such restaurant, Las Olas with two locations in San Diego, has partnered with The Compost Group to become the first full service restaurant in North County San Diego to compost food waste. Each year, Las Olas is able to compost 15,000 pounds of food waste and compostable packaging through The Compost Group.

According to their website, "we do everything we can to be an environmentally conscious operation in an effort to protect "la tierra" (the land), and "las olas" (the waves)." Plus, Las Olas uses only compostable foodservice ware for take-out operations, recycles all cooking oil to help fuel local school buses, and hosts yearly community beach cleanups.

A strong advocate for environmental and city developmental issues, Las Olas has been leading the way in sustainability and setting an example for the local community on how to run a business and respect the environment since 1981.

Naomi Wentworth is the founder of The Compost Group in San Diego. Frustrated by the lack of composting options for food waste in San Diego County, and with a background in climate policy, Naomi saw an opportunity to start a business picking up food scraps from local restaurants and residential communities and composting them.

"Moving into an apartment in Encinitas where I could not compost in my backyard, I would just feel my heart sink every time I put those beautiful coffee grounds, egg shells, and vegetable trimmings into the garbage to go to landfill," explains Naomi. "I started The Compost Group because I was frustrated by the amount of food waste being sent to landfills in my community."

The Compost Group's founder Naomi Wentworth in front of her aerobic composting vessel

The Compost Group is helping divert food scraps and compostable packaging from landfills. In 2020 alone, they turned 59,187 pounds of organic waste into soil.

"Of all the difficult solutions to complex problems we are facing as a society," says Naomi, "returning our nutrients to the soil is a really simple and (theoretically) easy solution."

Our Mission: To be of service to people and the planet

We envision a thriving world where everyone's basic needs are met with a beneficial impact on the environment.

The Importance of Compostables

More than 26 million tons of plastic are sent to U.S. landfills each year. Products made from plants, not petroleum, conserve resources and support cleaner production methods while protecting the health of our planet and diverting waste from the landfill.

We are one of the few companies in the U.S. to sell only plant-based, certified compostable products while striving to be a model of sustainability and generosity. Since 2009, we have given at least 25% of our net profits annually to grassroots social and environmental organizations as well as offered discounts to schools and non-profits. We also offset our carbon emissions

from raw material to delivery. In 2010 we became a Certified B Corporation, and in 2013 converted our legal structure to a California Benefit Corporation, demonstrating our continued commitment to make a positive impact on society and the environment.

Our Promise

Our products are designed for performance, strength and aesthetic. Our claims are third party verified and we regularly audit outsourced factories under Fair Labor Organization guidelines to ensure fair wages and working conditions.

Partners

We're passionate about collaborating with businesses and organizations to pioneer innovative approaches to environmental challenges. By partnering with our customers, we hope to inspire others to shift their behavior around consumption and waste.

COMPOSTABLE

Designed to Compost

All of our products are designed to be compostable in a commercial compost facility.

ZERO
WASTE

Reduce Waste

We strive to minimize waste by reducing our consumption and diverting waste to compost and recycling.

World Centric is a Best for the World Honoree

As a Certified B Corporation, World Centric joins over 3,000 companies committed to a higher standard of transparency, accountability, and performance. Being part of the B Corp community means we harness the power of business to solve social and economic problems. Each yearly recertification is a rigorous evaluation process determining that we have met comprehensive performance standards for our workers, community, governance and environment.

In September 2019, B Corp selected World Centric as a Best For The World Honoree, which means that our certification score is in the top 10% of B Corps worldwide. World Centric was selected in the Overall, Changemaker, and Governance categories. We rated high for our mission and engagement, corporate accountability, ethics, transparency, and articles of incorporation that state social and environmental purpose.

Memberships and partnerships

1% for the Planet is a global network of businesses that donate 1% of annual sales directly to approved environmental and sustainability nonprofit organizations.

We work with Post Landfill Action Network (PLAN), the global movement of college and university student leaders who help launch programs to fight the cycle of campus waste.

We partner with Rubicon Global to find cost savings across waste streams and to develop innovative ways to reduce, reuse and recycle materials.

Green America certifies businesses that are committed to using business as a platform for social change. Green businesses show leadership in their industry by embedding social responsibility into the DNA of their company.

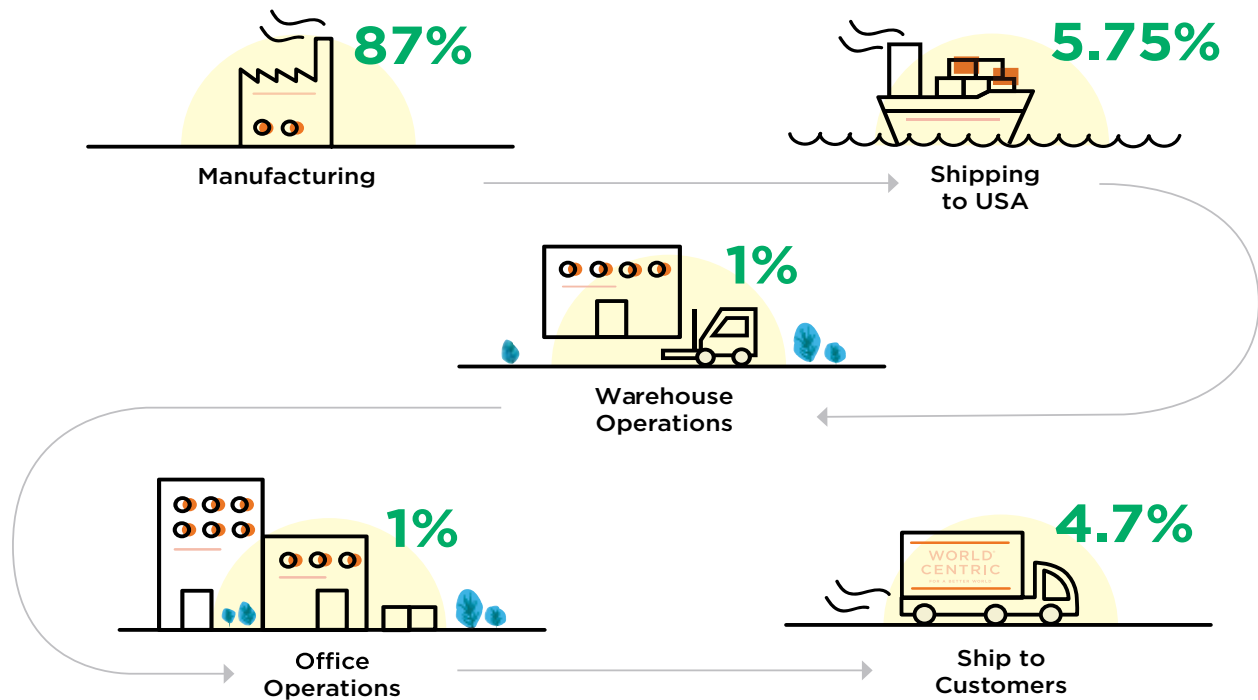

The National Minority Supplier Development Council Inc® (NMSDC®) is the global leader in advancing business opportunities for Asian, Black, Hispanic and Native American suppliers in the corporate supply chain.

Taking the right steps towards a zero carbon world

\$487,000
2020 Carbon Giving

Our Emissions

We assess and offset our carbon emissions created in the process of making our compostable goods and running our sustainable business, from the production of raw materials and manufacturing, all the way to the transportation to your front door.

Our Efforts

Individuals and companies can reduce their carbon footprint by reducing emissions from energy consumption and investing in renewable energy like solar and wind energy production, along with carbon offsetting programs such as planting trees.

Our Partnerships

Partnering with other grassroots organizations, we have become carbon neutral by focusing on carbon sequestration through tree planting and supporting projects with direct benefits to communities and people.

Take the first step towards sustainability

Climate change is one of the biggest challenges facing humanity. Every action we take as a business has a consequence, so we have taken steps to lower the carbon emissions that come from our manufacturing.

World Centric products take less energy to make than traditional disposables and we work to reduce

carbon emissions throughout the entire lifecycle of our compostable goods. We also partner with environmental and social organizations whose programs not only offset our carbon emissions but engage local communities.

We have the sustainability services to give you more tools to help your business make the switch to compostables.

Our team can help you identify the haulers, composters and other services in your area to increase waste diversion. We can also help you advocate for new services as well as develop user education, posters and bin signage to communicate proper waste disposal to customers, students or staff.

For more information please contact your sales rep or email us at zerowaste@worldcentric.com.

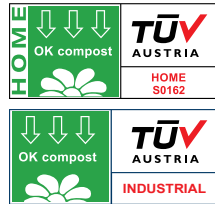

Our third party verifications and testing

We take our efforts to create a better world seriously. We test our products using the American Society for Testing and Materials (ASTM) standards to ensure they break down in commercial composting facilities. We obtain our tree fiber certified to be from responsibly harvested forests. Additionally, we test for allergens and quality.

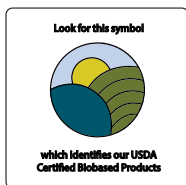

Biodegradable Products Institute (BPI)

BPI is a third-party organization that reviews and certifies commercially compostable products that meet ASTM standards for compostability. To learn more about BPI, please visit bpiworld.com.

TÜV AUSTRIA

TUV Austria is a third-party organization that reviews and certifies compostable products. Our TÜV certifications include OK Compost Home for our PLA bags and OK Compost Industrial for our fiber containers. For more information, visit tuv-at.be.

USDA BioPreferred Products

The USDA Biobased Product label indicates that a product has been independently certified to meet USDA BioPreferred program standards for biobased content. Biobased products are composed either partly or entirely of renewable plant materials. Visit biopreferred.gov to learn more.

Forest Stewardship Council (FSC®)

FSC® certification is a market-based tool that supports responsible forest management worldwide. FSC certified forest products are verified from the forest of origin through the supply chain. The FSC label ensures that the forest products used are from responsibly harvested and verified sources. Visit fsc.org for more information.

Gluten Testing

Our fiber plates have been tested by Anresco Laboratories, an independent facility for the measurement of cereal gluten at low levels, nominally within a range of 5-80 PPM, both in our raw materials and finished food products. Analytical Results: Wheat Straw Plates: <5 ppm

For a complete list of third-party reports and test results including fair labor audits, food safety audits, and product testing, please visit worldcentric.com/ reports.

BPI Item Category	Certificates #1918104-

PLA Clamshells, Deli Containers, Cold Cups, Straws, Lids	99% BioBased
Fiber Containers and Tableware	95% BioBased
Paper Hot Cups and Bowls with PLA Lining	100% BioBased

Three great reasons to use our products

1. Sustainable Materials

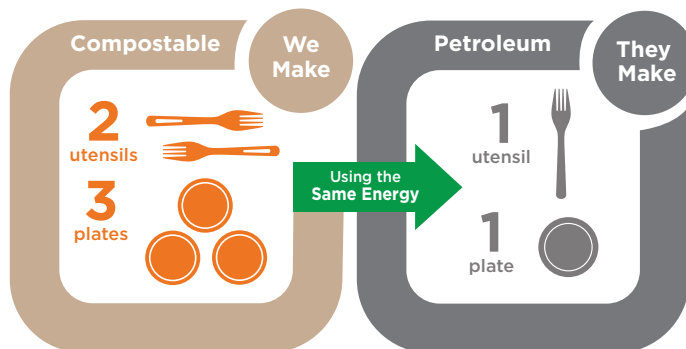

Our materials are chosen for their sustainability. For example, molded fiber products are made from annually renewable plants such as sugarcane bagasse and wheat straw which also sequester carbon while growing and are agricultural by-products.

2. Reduce Waste

When commercial composting is available, our foodservice ware diverts waste from the landfill and composts in 2-4 months. Plastic containers contaminated with food are rarely recycled. Expanded polystyrene easily becomes litter due to its light weight, and is also challenging to recycle. It is estimated that only 9% of all plastic ever created has been recycled.

3. Less Energy

Our products require less energy to produce than petroleum-based products, which reduces greenhouse gas emissions, lessening the impact of climate change.

Compostable Products Materials Chart

	Material	Sourcing	Products	Heat Resistance	Time to Compost*
	Molded Plant Fiber	Unbleached bamboo, sugarcane and wheat straw	Fiber plates, bowls, containers, clamshells, pans, trays, cutlery	Suitable for foods up to 200° F	2-4 months
	Plant Fiber Paper	Produced from crop residues and alternative fibers like bamboo and sugarcane	NoTree paper hot cups, cold cups, bowls	Suitable for liquids up to 220° F	2-4 months
	FSC®/SFI® Paper	FSC®, SFI® paper from responsible sources	Paper hot cups, bowls, paper straws, container sleeves	Suitable for liquids up to 220° F	2-4 months
	Recycled Paper	Post-consumer recycled paper	Hot cup sleeves, napkins, towels	Not applicable	1-2 months
	Polylactic Acid (PLA)	PLA derived from plant sugars like corn or sugarcane	Cold cups, lids, clear deli containers, salad bowls	Suitable for cold food and liquids	2-4 months
	TPLA	Made from PLA with talc mineral added	Cutlery, ZeroWare reusable dishware	Suitable for foods up to 200° F	3-6 months

*Composting estimates are based on a commercial composting facility. Facilities may not exist in your area.

OUR PRODUCTS ARE RESPONSIBLE FROM START TO FINISH

Molded Fiber Containers & Cutlery

- Made from unbleached bamboo, sugarcane and wheat straw plant fibers
- Bio-lining (where indicated) made from plants
- Gluten free
- Conform to FDA guidelines for food use

PLA and TPLA Cutlery

- PLA Cutlery (non-GMO) made from plant sugars
- TPLA Cutlery has talc added for heat resistance
- Conform to FDA guidelines for food use

Paper Cups & Bowls with Bio Lining

- NoTree® cups and bowls made from crop residues and alternative fibers like bamboo and sugarcane
- White cups and bowls made from FSC® or SFI® certified paper from responsibly managed forests
- Bio-based linings
- Conform to FDA guidelines for food use
- Not microwavable

Cold Cups, Deli Containers & Lids

- Made from PLA, derived from plants
- Conform to FDA guidelines for food use

Food Scraps, Kitchen and Yard Waste Bags

- Made from synthetic and starch-based plastics
- Certified OK Compost Home by TÜV AUSTRIA
