

# Affordable Eco-Friendly *Foam Alternatives*

## Solutions with Improved Performance

### ATTRACTIVE PRESENTATION & CONSUMER CONVENIENT

Hinged or separate black bases and clear lids highlight and preserve the food presentation for an enjoyable take-out experience. Consumer convenient, table-ready containers maintain that “just-made” appearance with no re-plating necessary. Heat & eat in the same container. Convenient tear-away lids on the hinged packages fit snugly under the base for easy eating on the go.

### DURABLE AND REUSABLE

All packages are made with durable, cut resistant polypropylene and designed to be dishwasher safe and consumer reusable multiple times. Easy opening tabs and re-close features make these the perfect containers to store leftovers or other items at home.

### HIGH HEAT PERFORMANCE & LEAK RESISTANT

Polypropylene hinged and two-piece packages withstand temperatures up to 230°F when used with hot food, under heat lamps or in the microwave. No off-odors or off-flavors during heating like some polystyrene containers. Leak-resistant closures assure no messy spills during handling or transport. Anti-fog, vented clear lids keep food looking fresh and appealing while preventing order errors.

### RECYCLABLE – CURBSIDE

All polypropylene packages remain recyclable after multiple uses.

Visit our website: [anchorpac.com](http://anchorpac.com)

Over 300 package solutions made with polypropylene, natural mineral-filled polypropylene, PETE or FDA approved post-consumer recycled content RPET for all of your hot and cold food applications.

**All products are BPA-free and  Kosher approved.**
