ABOUT NORTECH LABS

Nortech Labs, Inc. is a pioneer and leader in gel manufacturing. As the original inventor of the Thermo-Kool® Hot / Cold Gel Therapy Pack (Patent # 3,780,537), we are constantly striving to develop new and innovative ways of incorporating our gel into different products.

Over the past 50 years we have expanded our capabilities and are now servicing our products all over the world. As of 2014, our product line reaches over fifty markets including health professionals, dentists, surgical dealers, wholesale/distributors, government agencies, hospitals, rehabilitation centers and much more.

When faced with adversity, Nortech strives to think outside the box and implement safer products for an ever growing healthcare and first aid market. In 2005, Nortech Labs developed InstaKool Instant Cold Pack, an Ammonium Nitrate Free product with the use of a proprietary formula CarbamaKool™.

Nortech Labs is also a distributor of first aid, cold temperature transport, positioning, home healthcare, and emergency disposable products.

 **All Nortech products are proudly manufactured in the U.S.A.**

Product Development & Consulting Services

Let Nortech help you develop and customize your products. We understand that branding and packaging are key components for the optimization of any business. Nortech offers consulting for a wide range of customized products in the first aid, gel therapy and positioning markets.

We specialize in private labeling instant cold or hot packs that are environmentally friendly and hazmat free! All our products are non-toxic and ammonium nitrate free.

Nortech's lightweight gel is used in a variety of applications that include, but are not limited to, gel positioning aids in the neonatal and perineal markets, gel packs, gel bladders, gel pillows for positioning or pressure relief, and cold or hot gel packs used in a variety of applications in the therapy market.

Rather than hiring a high priced consultant who may be unfamiliar with most manufacturing processes, Nortech offers product development and consulting services for a nominal fee. We work closely with you to develop a product customized to your specifications.

FOR FURTHER INFORMATION, PLEASE CALL US AT 1-888-COLDPAK (265-3725)

Providing green and innovative quality products to the medical, healthcare and cold chain shipping industry for over 50 years.

GEL BLOX

COOLER & SHIPPING PACK

GEL REFRIGERANT SHIPPING PACKS

NON-TOXIC ◦ REUSABLE ◦ LATEX FREE

GEL BLOX™ Shipping Pack is a non toxic water-based gel refrigerant shipping pack specifically designed and engineered for COLD transport and storage of perishable items and shipping heat sensitive products. Designed as a safer alternative to dry ice, GEL BLOX™ are great for cold transport of various foods, pharmaceuticals, vaccines, blood samples, medicines, chocolates, meats and other perishable items.

Available in No Sweat (reduces condensation) and Foil Material (deflects heat).

GEL BLOX™ NON-TOXIC GEL SHIPPING PACK FEATURES:

- Specifically designed and engineered for COLD transport.
- Safe to Use & Safe to Ship
 - Non-Toxic Food Grade Polymer
 - Eliminates Hazardous Material Charges for Shipping
- Ideal for Cold Transport of Pharmaceuticals, Vaccines, Medicines, Meats and other Perishable Products.
- Can be molded or frozen flat.
- Stays colder longer.
- Reusable, Non-Toxic and Latex Free.

All cases are specially vented for case freezing.

Foil Metalized Gel Packs

Structured gel encased in a laminated, metalized film exterior, providing a radiant heat barrier. Resists punctures and provide longer protection.

No Sweat Gel Packs

Tough Multi-Layered Film Laminated poly exterior treated with a non-woven material. Protects products from moisture damage limiting surface condensation.

GEL BLOX™ is the perfect solution for shipping perishables requiring temperature control such as: *Pharmaceuticals and Bio-Medical products, Meats, Seafood, Dairy, Vegetables, Fruits & Flowers*

**GREAT FOR LUNCH BOXES,
PICNICS, CAMPING, SPORTS
& MORE!!**

COOL BLUE™

Patented Insulated Box Liners (Box Inserts)

Heat reflecting technology outperforms foam, takes up a fraction of space, and costs less!

Made with recycled
FDA approved plastic
and reusable foil.

- ▶ **Cool Blue™** box inserts cost generally 10%-20% less than styrofoam EPS coolers.
- ▶ Box inserts fold down for easy storage, taking up less warehouse space and reduce your inbound freight charges.
- ▶ Bubble based products add to cushioning for protection of the contents.
- ▶ Dirt smudges show easily on foam, while Cool Blue™'s shiny exterior provides a clean and pleasant presentation.

COOL BLUE™ Insulated Box Liner Assembly Steps

**NEW DESIGN FOR
ADDED INSULATION!**

1

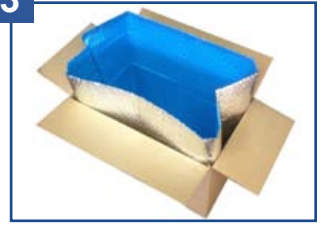

Insulated Box Liner comes flat with 1" Adhesive Tape.

2

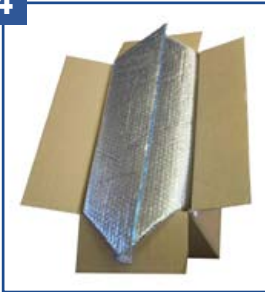

Fold bottom corners up to fit into box.

3

Slide Insulated Box Liner into box.

4

Remove Adhesive Tape and fold over to seal top.

5

Fold top flap into sides of box for added insulation.

COOL BLUE™ Bubble Rolls

- Available in multiple sizes.
- Can be cut down to fit different applications.
- Great for lining 48' or 53' trailer gaylords, and more.

ITEM #	HEIGHT	LENGTH

NFBR48125	48"	125'
NFBR60125	60"	125'
NFBR65250	65"	250'
NFBR72125	72"	125'

COOL BLUE™ Foil Bubble Mailers

Environmentally FDA Friendly Padded Envelopes

Foil Bubble Mailers by COOL BLUE™ costs less and takes up less space than traditional foam insulation. Mailers are bubble laminated for durability and protective cushioning. Unlike traditional foam, COOL BLUE™ insulation acts as a shield against the three types of heat transfer: conduction, convection and radiant. The bubbles and poly prevent conduction and convection heat transfer while the foil reflects 97% of the radiant heat. Mailers come complete with adhesive strips for easy sealing.

Tests have shown that COOL BLUE™ insulation retains the desired temperature for several days. Foil Bubble Mailers are ideal for overnight boxes. Custom sizes available to fit your specific needs.

Introducing

KODIAK PACK

SPECIALY DESIGNED FOR PHARMACEUTICALS

FLEXIBLE THERMAL PACKAGING

Patent Pending

IMPROVE YOUR CUSTOMERS PAYLOAD PROTECTION!

FEATURES

- A multi-layered metallized film composite exterior that reflects 97% of radiant heat.
- An airtight payload chamber with heavy duty FDA approved ziplock closure and a flap down sealing tape.
- Custom engineered mechanical foam insulations
- Superior seam strength creates airtight construction and crush resistant bladders.

DON'T TRUST VALUABLE TEMPERATURE SENSITIVE PAYLOADS TO PACKAGING TECHNOLOGY OF THE PAST

Improve your bottom line and add to your product line. Help your customer engineer a cost effective cold chain system to insure that valuable temperature sensitive payloads arrive in optimum condition.

How Kodiak Pack Works:

1. **CLOSURE:** Our heavy duty closure system is two fold. The FDA approved zip lock inner closure joins the front and rear air tight bladders, sealing the payload chamber making it airtight and leak resistant. Our tape is a tamper resistant, wide, low temperature, (10 mil) adhesive strip designed to maintain its integrity even when the envelope is packed in dry ice. Engineered to endure extreme temperatures externally or from within, it is the safe guard for an airtight leak resistant payload chamber.

2. **INSULATION:** Our proprietary insulation is a product of multi purpose engineering. This loosely intertwined fibrous "mechanical foam" provides a static zone of encapsulated air space to restrict the penetration of thermal energy. It is also designed to be compatible and bond into the bottom and side seams with our chill film and inner PET to create air tight insulated seams, structural integrity, superior crush resistance and burst strength.

3. **FILM:** Our proprietary film is a multi layered metalized composite. It has two mirrored depositions and is the first line of defense against radiation, convection and conduction. It reflects 99% of all radiant heat transfer. It has very low porosity to minimize oxygen transfer. It is vacuum formable, puncture resistant and has high burst strength. It is flexible and out performs foil in flex tests 25 to 1. It is FDA approved, an aroma barrier and is easier to dispose of than foil.

4. **SEAMS:** Our insulation is engineered to seal into the bottom & side seams in a proprietary seam sealing process. Front and back outer films, inner films and insulation seal together (6 layers) making two airtight bladders that encapsulate the payload, creating superior seam/burst strength, structural integrity, crush resistance and airtight insulated seams.

ULTRA TEMP Containers

ULTRA TEMP containers are designed to be extra sturdy containers for the shipment of perishables that require a higher retention time and insulation in the shipping environment. Most often used in the shipment of direct mail food service, pharmaceuticals, and other sensitive perishables. These well made thick wall containers provide the protection and performance your most sensitive products require.
